

# Reuse Reduce Recycle

*By: Isadora B. S. Luize, Sofia M. Hamamoto and Gabriela Damerai*

**GLASS**  
**REUSE**

Ways to reuse the glass:

We can reuse the glass in decoration.

One example is, you can use your burning lamp to do this:

Or this:

We can use the glass also to...

save so many things.

The glass expend one million of years to decompose than. We need reuse it!

Recyclable glass:

Pots of food

Shards of glass

Vials of medicine

Perfume bottles

Windshields

ETC

# PAPER

## REDUCE

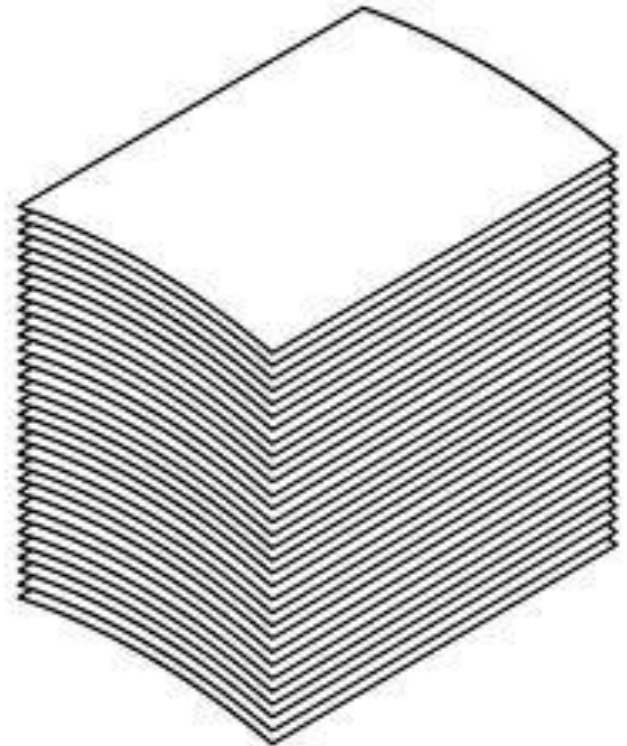

Paper use is expected to double by 2020. The average consumer uses over 500 gr of paper products every year, which is 10 times more than a century ago, and almost twice the consumption since the 1970s. There are a number of things we can do to reduce our consumption.

What we can do for reduce the consumption of the paper ?

We can...

- Enjoy the both sides to print and write
- Review the text before print
- Reuse the scraps of paper for drafts and tickets
- Reuse brochures of advertisements
- Pay bills online
- Only print what's necessary

# PLASTIC RECYCLE

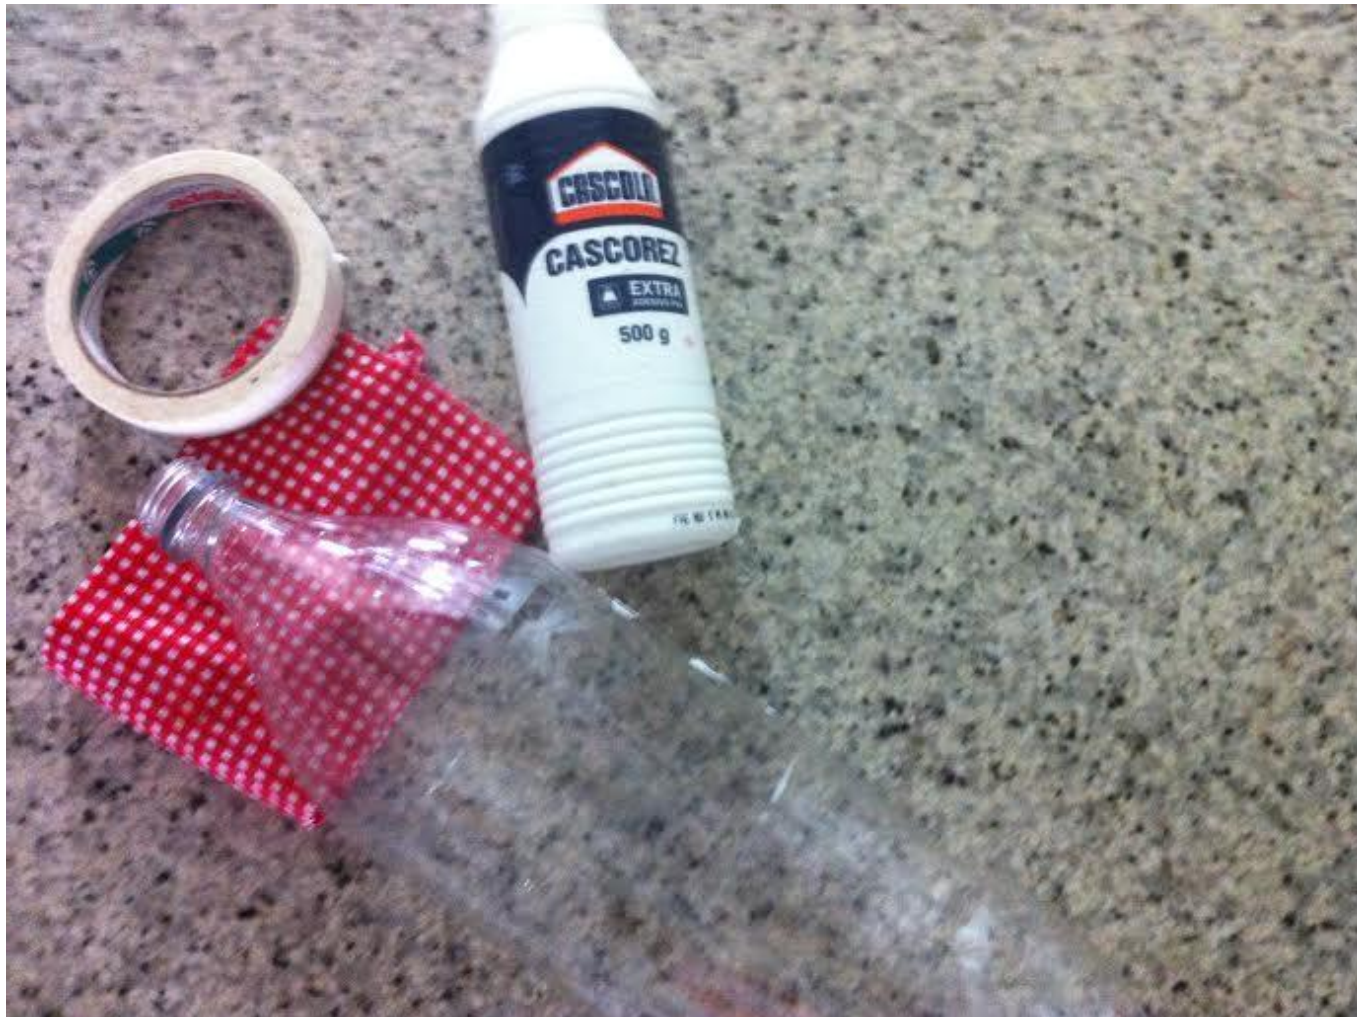

We use the plastic for a lot of things, principally for packaging...

The plastic spend one hundred years to decompose than.

So... we have many ideas to recycle de plastic...

For do a bracelet with plastic we need: pet bottle, glue, adhesive tape and any cloth:

After... you cut the bottle (like this:)

Then you cover the part of pet bottle with adhesive tape:

Finally you put cloth on your bracelet...

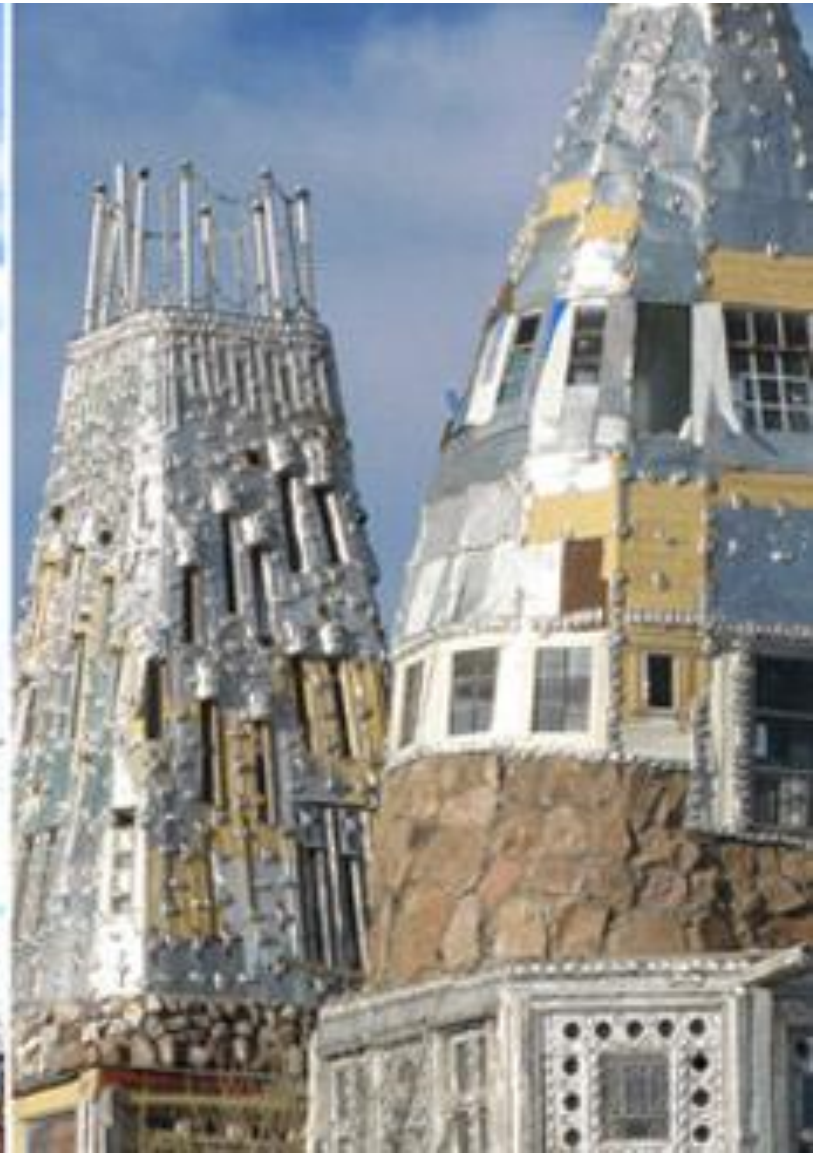

# Curiosities:

All this houses were made with recycled materials!!

**Thank you!**
