What do you know about recycling?

I know it is very important to the ecology.

What happens to your garbage?

I usually recycle

Why is it important to recycle?

It is important to the nature conservation.

What can it become when it is
recycle?

Plastic- Garden hose, bottles,
cleaning...

Paper- The paper can be recycled to
7 times.

Metal- aluminum cans (soda, beer,
etc.) and steel (cans of sardines,
sauces, oil, etc.)

Why should we recycle, not to pollute the planet?

What usually happens to plastic?

Bring an example of a recycled material made of it.
